

Columbus FAASTeam presents:

Revised Date / CFI Open Forum - Teaching With Tablets

This CFI forum will discuss the rapidly emerging role of the EFB, while emphasizing the need for initial and recurrent training for CFIs and pilots. Further, common mistakes that should be acknowledged will be discussed as well as considerations for using EFBs to address special emphasis areas during a check ride. Finally, recommendations will be presented to underscore when and how to integrate EFBs into pilot training to enhance single pilot resource management.

EFB's can provide pilots with data-linked preflight and en route weather, airport information, topographical features, improved situational awareness, and a host of other resources.

Directions: Lane Aviation is located on the right side as you drive toward the terminal on International Gateway. Turn right into Lane Aviation entrance, bear to right of flag pole, enter building with maroon awning (4387) over the door, up the stairs to second floor, room on the left.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
